

## Supplier Communication - Covisint

Dear Supplier,

As you have permission to access the Adient Portal (Global Supplier Scorecard report, GLIMS) via Covisint, we want to inform you of a security update

Covisint is enhancing their security layer in order to align with industry best practices for security and data integrity. What this means for you:

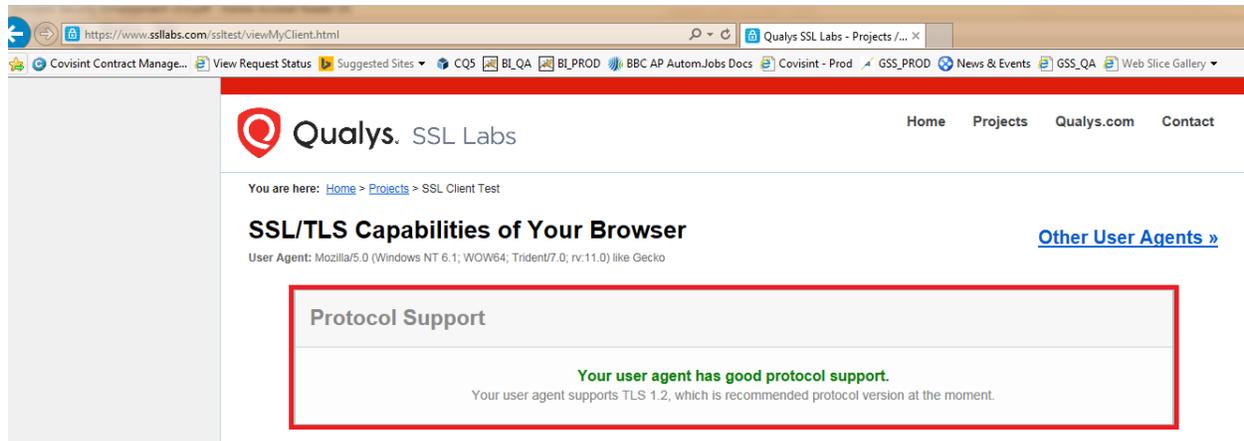

- Please ensure your browser(s) are compatible with TLS 1.2 (Transport Layer Security). You can refer to the attached FAQ and also by visiting the [SSL Labs site](#) to see if your browser(s) need to be updated.
- Verify your browser capability with TLS1.2 by November 1.
- Failure to update your browser will result in the inability to use the Adient Portal on Covisint to access your scorecard.

Thank you for your attention to this safety item,

Adient Procurement and Supply Chain

How to check if your browser is compatible Covisint :

1. Access the below URL:  
<https://www.ssllabs.com/ssltest/viewMyClient.html>
2. Look for the following message on your screen:

The screenshot shows a web browser window with the URL <https://www.ssllabs.com/ssltest/viewMyClient.html>. The page header includes the Qualys SSL Labs logo and navigation links for Home, Projects, Qualys.com, and Contact. Below the header, the breadcrumb trail reads "You are here: Home > Projects > SSL Client Test". The main heading is "SSL/TLS Capabilities of Your Browser", with a link for "Other User Agents »". The user agent string is displayed as "User Agent: Mozilla/5.0 (Windows NT 6.1; WOW64; Trident/7.0; rv:11.0) like Gecko". A red-bordered box highlights a section titled "Protocol Support" which contains the message: "Your user agent has good protocol support." followed by "Your user agent supports TLS 1.2, which is recommended protocol version at the moment."

3. If you did not get the above message, contact your IT department and forward the attached documentation to help you update your browser(s) as appropriate.
